# Vacation Rentals Booking Calendar (VRBC)

Upgrading v.1.0.6 to v.1.1.1

Backups

1. Backup your existing VRBC MySQL Database

Login to your website's control panel and open **Backup**

Click on your calendar database name and then **download** the backup file and **save** it on your local computer.
We will not use this file on this upgrade process. Just Back Up.
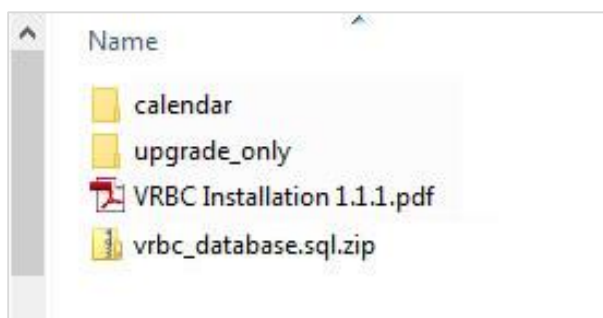

2. Backup your existing config file

Backup/download your existing *includes/config.inc.php* file and **save** it on your local computer.
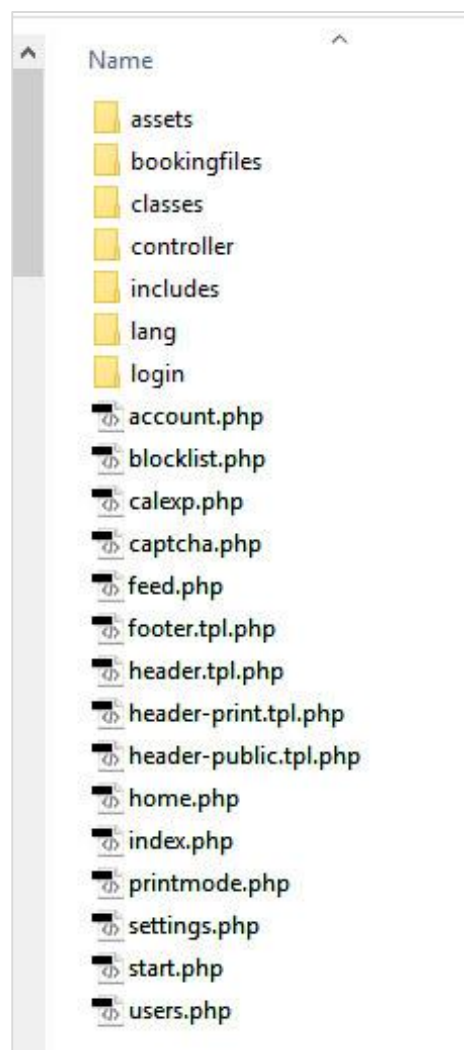

3. Backup your existing language files

Backup/download your existing *lang* folder and its contents. **Save** it on your local computer.
Probably you already translated or edited them.

Extracting Files

Unzip the VRBC package into your local hard drive. It will extract the following files:

Next, open the **calendar** folder =>

Uploading Files

Make sure you have done the backup.

Using an FTP program (such as Filezilla, which is free, or a commercial app such as CuteFTP), login to your web server and **upload and replace all** the files in the folder 'calendar' to your website 'calendar' installation directory.

Restoring the Config File

After replacing all files with the new, now we need to restore the configuration file.
Upload the backup config.inc.php file and replace the standard *includes/config.inc.php* file on your server.

Copy the contents of "upgrade_only\from 1.0.6 to 1.1.1\config.inc.php-Lines-Addition.txt"and then paste it to the bottom of the config file, right before the php closing tag **?>**.

So the new config file will become:

```
37
38  //Display MySQL errors debugging. true is Not recomended for live site:
39  define('DEBUG', false); // true / false
40
41  //Currency
42  define('CFG_CURRENCY', 'USD');
43  define('CFG_CURRENCYSYMBOL', 'US$'); //Currency Symbol
44  define('CFG_DECIMALSEPARATOR', '.'); //Decimal Separator . point / , comma
45
46  define('FILES_DIR', 'bookingfiles'); //Booking Attachment Files Folder Name
47  define('FILES_MAXUPLOADSIZE', 1048576); //Max size of each file, in Bytes.
48  define('FILES_MAXUPLOADSSIZE', 5242880); //Max total size of files, in Bytes.
49  // 524288=500KB / 1048576=1MB / 2097152=2MB / 3145728=3MB / 5242880=5MB / 6291456=6MB / 7340032=7MB
50
51  //Max number of files attached to a booking block
52  define('FILES_MAXATTACHED', 5);
53
54  //Number of file browser/selector
55  //Set 0 to disable file upload
56  define('FILES_BROWSENUM', 1);
57
58
59  //Allow Multiselect files in File Upload Dialog with Ctrl or Shift
60  //Best if source files located in the same folder.
61  define('FILES_MULTISELECT', true); // true / false
62
63
64  // filter filetypes in File Upload Dialog
65  define('FILES_TYPES_ACCEPTED', '.jpg,.jpeg,.png,.pdf,.rtf,.doc,.docx,.xls,.xlsx');
66
67  // Limit past years in public view
68  define('CFG_PUBLPASTYEARS', 1); // 0,1,2,3..... Set 0 to disable past year(s)
69
70
71  ?>
```

Save the changes you have made to the *includes/config.inc.php* file.

Language Files

If before you have edited the phrases of some languages, then upload the backup **lang** folder and its contents and replace the standard *lang* folder on your server.

Next, you need to add the new phrase lines for **each** language file.

Copy the contents of "upgrade_only\from 1.0.6 to 1.1.1\lang-Lines-Addition\xx-lang.xml-Lines-Addition.txt" and then paste it to the bottom of the corresponding language file, right before the xml closing tag **</language>**.

If you have added other language than the standard, you can add the contents of **en-lang.xml-Lines-Addition.txt** and then translate the new phrases later using the built in phrase editor.

So the new **en** language file for example will become: (also the other language files in its language)

```
449    <phrase data="_UIOPTIONS">UI Appereance</phrase>
450    <phrase data="_UICORNERS">Square Corners</phrase>
451    <phrase data="_GNL_PCV_LOGGEDIN">You are logged in as</phrase>
452
453    <!-- Update 1.1.0 -->
454    <phrase data="_GNL_VIEWPUBLICCAL">View Public Calendar</phrase>
455    <phrase data="_GNL_SYSOPTS">System Options</phrase>
456    <phrase data="_GNL_SYSSETTINGS">System Settings</phrase>
457    <phrase data="_GNL_COMPANY">Company</phrase>
458    <phrase data="_BKG_AMOUNT">Amount</phrase>
459    <phrase data="_BKG_DEPOSIT">Deposit</phrase>
460    <phrase data="_BKG_BALANCEDUE">Balance Due</phrase>
461    <phrase data="_FILES_ATTACHMENT">Attachments</phrase>
462    <phrase data="_FILES_FILEDELETED">Attachment deleted</phrase>
463    <phrase data="_FILES_FILE">File</phrase>
464    <phrase data="_FILES_ALLFILES">Total file size</phrase>
465    <phrase data="_FILES_LARGER">is larger than</phrase>
466    <phrase data="_FILES_CANTLARGER">cannot be larger than</phrase>
467    <phrase data="_FILES_ATTACHMAX1">You can only attach</phrase>
468    <phrase data="_FILES_ATTACHMAX2">files.</phrase>
469    <phrase data="_FILES_ATTACHMAX3">more files.</phrase>
470    <phrase data="_FILES_MULTIPLE">select files</phrase>
471    <phrase data="_FILES_SINGLE">select a file</phrase>
472    <phrase data="_UR_ASSIGNMENT">Assignments</phrase>
473    <phrase data="_UR_ASSIGNEDPPTY">Assigned Property Types</phrase>
474    <phrase data="_UR_ASSIGNED">Assigned</phrase>
475    <phrase data="_UR_ASSIGNPPTY">Assign Property Types</phrase>
476    <phrase data="_UR_NOASSIGNED">No property types assigned yet.</phrase>
477    <phrase data="_PPT_TYPESNOASGN">There are no property types assigned for your account. Please contact the
       Administrator.</phrase>
478    <phrase data="_GNL_HIDEINPUBLIC">Hide in Public</phrase>
479    <phrase data="_PRINT">Print</phrase>
480    <phrase data="_PPT_LINKOPTS_R">Select a property type to generate the link</phrase>
481    <phrase data="_BKG_FEEDLINKDESC">The feed links of the availability can be used by third party systems if you
       want to share availability information with them.</phrase>
482    <phrase data="_BKG_EXPCALLINKDESC">The export links of the calendars will generate the iCalendar (.ics) file.
       Use the link or press the Download button to export the calendar.</phrase>
483    <phrase data="_BKG_PUBLICLINKDESC">The public links of the calendars used to access the public view of all
       property types or specific property type.</phrase>
484    <phrase data="_PPT_TYPESNONEPUBLIC">There are no property types published or set public. Please setup in the
       Admin Settings.</phrase>
485    <phrase data="_MONTH">Month</phrase>
486    <phrase data="_YEAR">Year</phrase>
487    <phrase data="_OUTPUT">Output</phrase>
488    <phrase data="_STARTMONTH">Start Month</phrase>
489    <phrase data="_STARTYEAR">Start Year</phrase>
490    <phrase data="_STARTCALNUM">Calendars</phrase>
491    <phrase data="_BKG_SCRESULTS">Search result for</phrase>
492    <phrase data="_BKG_SCLISTEMPTY">There are no booking blocks match the keyword</phrase>
493    <phrase data="_BKG_SCYOURLISTEMPTY">You don't have booking blocks match the keyword</phrase>
494    <phrase data="_BKG_SCINSTRUCT">Enter Guest Name, Email Address or State/Country</phrase>
495
496    </language>
```
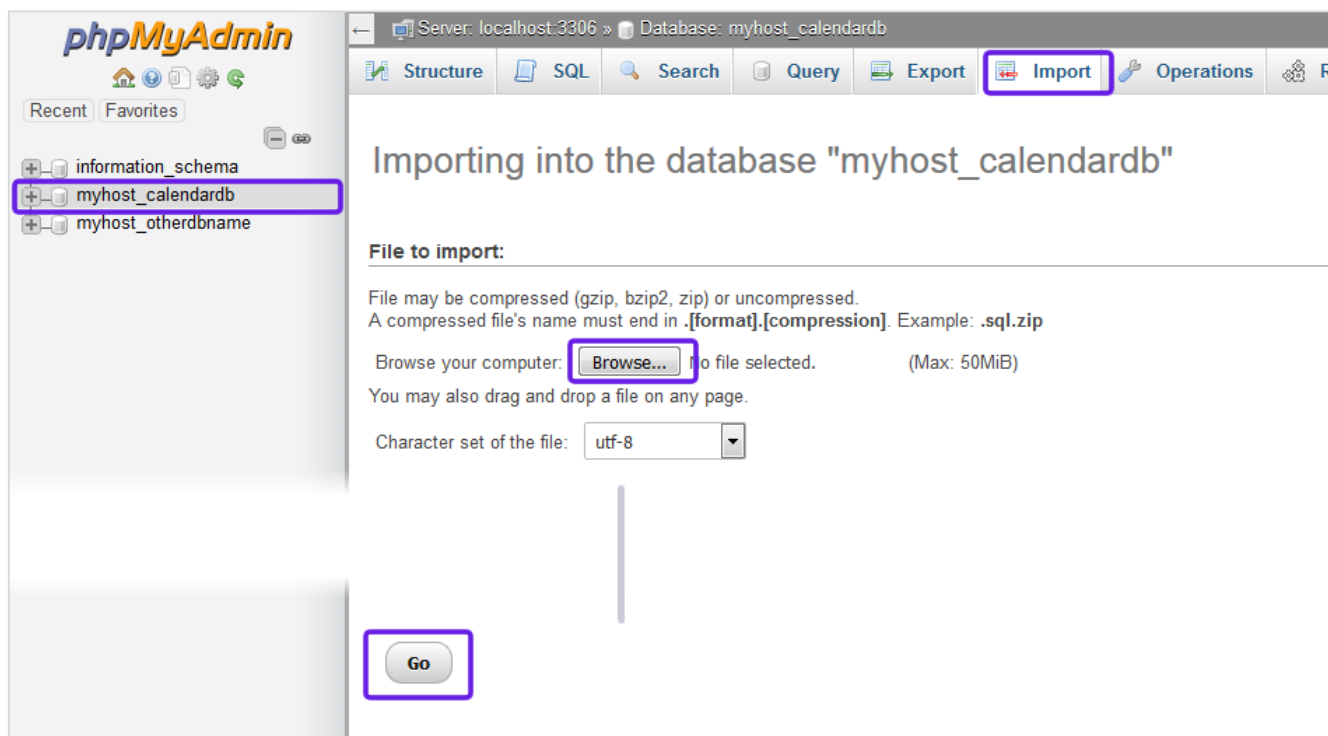

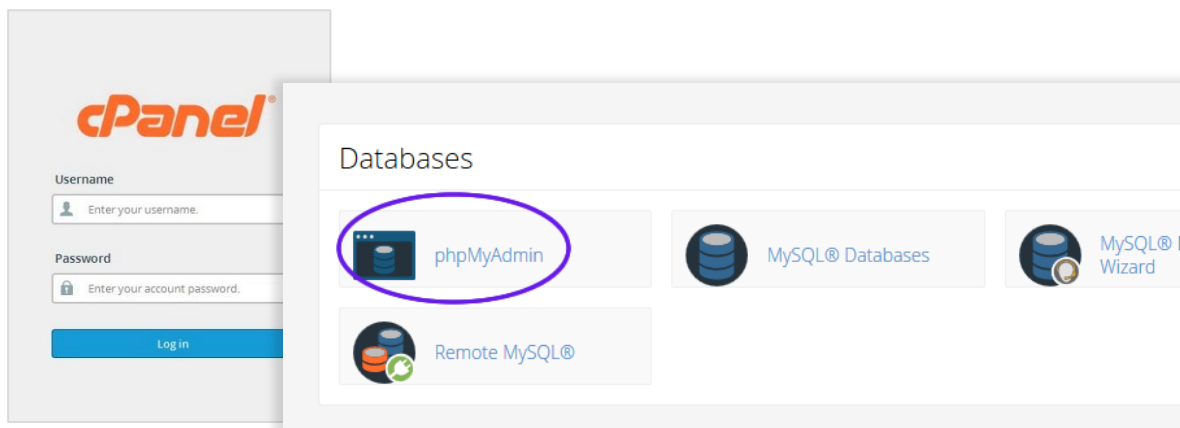

Save the changes you have made to each *lang.xml* file.
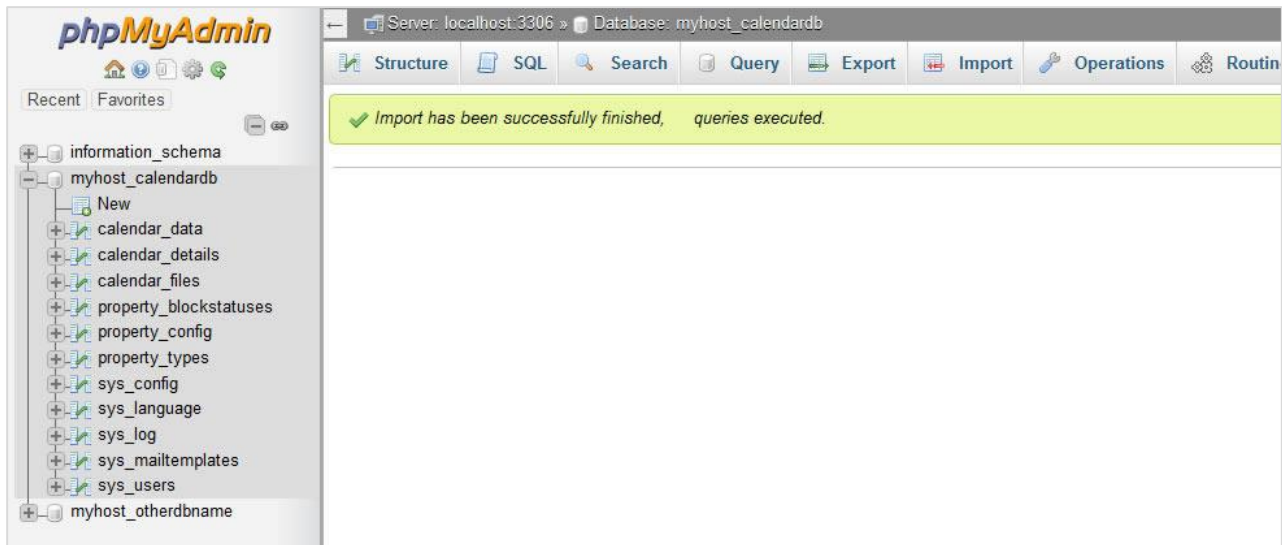

Upgrading Database Tables

Setting up your database may differ with your webhost and what software they use for your web hosting control panel. If you don't know how please ask your hosting provider. Just for example, below is the illustration how import MySQL database structures.

1. Login to your website's **control panel** and open **phpMyAdmin**

Select your VRBC calendar **Database Name** then click the **Import** tab.

And then click **Browse** button to select upgrade_1_0_6_to_1_1_1.sql.zip from the upgrade_only folder in the extracted files on your computer. Scroll down, then press **Go** button to proceed with the import process. **Wait .... Until the import process finished.**

Import finished. Upgrade completed.

Now you can access your calendar. Next, login as administrator and then assign each user to property type(s).

Thank you so much for using this script!

Future feature suggestions from you are welcome.

Your words matter! Please rate this script on CodeCanyon
